This latest collection of Airolam Laminates has been envisioned and executed with a distinct approach. The concept has been inspired by the design, fashion and creativity wanted by everyone.

This collection features sensational designs and textures that are appropriate for modern furniture, wall coverings, table tops and other applications. We have curated this exclusive group of decorative surfaces, which are well crafted for utilizing your space in the best manner.

About Concept

INTERACTIVE INDEX

Please click on the Sample beside the Finish Name to scroll to the specific finish page

Click on the Home button to return back to the Finish Index.

1. Open downloaded e-PDF on any device.
2. Browse through our entire collection right on your fingertips.
3. Like a product or design? Click anywhere on the product to open its dedicated webpage.
4. Here you will find the following details about the Product you chose:
 - Full Sheet View
 - Application Preview
 - Available Textures
 - Technical Details
 - Option to send an enquiry
5. You can find the same information about all the products in the PDF by clicking on them.

Traceless Surface

High Scratches
Resistant

MADE WITH SPECIALIZED TECHNOLOGY,
THIS RANGE IS ALL ABOUT ITS SPOTLESS
AND FLAT SURFACE.

AFPL SURFACES ARE ALSO ANTI-MICROBIAL,
HYGIENIC AND RESISTANT TO SCRATCHES.

THE LAMINATE SURFACE IS SMOOTH TO
TOUCH AND ALSO STRONG.

Non-reflective
Surface

Easy to Clean

BENEFITS:

- ELIMINATES THE POSSIBILITY OF FINGER PRINTS AND SMUDGE MARKS
- SOFT TO TOUCH AND HAS A VERY LOW LIGHT REFLECTION PROPERTIES

GENERAL CARE & MAINTENANCE

- **Storage & Carrying:** Always store the sheets face down and in a horizontal position. To protect the sheets from damage, put a hard cover on top of the stack. Make sure to stock the laminates in a way that older sheets are used first. Store the laminates in a place, which is free from moisture and away from doors & windows. The sheets should be carried vertically. Avoid sliding the sheets, instead lift them while moving them from once place to another. To avoid any damage, 2 people should carry one sheet.
- **Stains:** The laminates are resistant to stains belonging to Group 1 and 2. Solutions of Group 3 and 4 should not be spilled on the surface. If spilled, wipe off the solution from the surface immediately.
- **Abrasives:** The use of abrasive pads, scouring powders or cleansers can make the laminates susceptible to staining and permanently damage them.
- **Harsh chemicals:** To avoid etching and discoloration of laminates, keep them away from harsh chemicals such as oven cleaners, toilet cleaners, or drain cleaners. If spilled over the surface, wipe off immediately, rinse thoroughly, and wipe dry.
- **Hot Objects:** Laminates have high heat resistance, but exposure to temperatures greater than 135°C is not recommended. Do not expose the laminate to temperatures above 65°C as it may cause the laminate to separate from the substrate. It is highly not recommended to place hot frying pans or dishes directly from the oven or cooktop on the laminate surface. You may use a trivet or insulated pad to protect the surface from heat generating appliances.
- **Sharp Objects:** Do not use knives or other sharp objects on the decorative surface. Use a chopping block or counter saver to protect the laminates.
- **Impact:** Even though the laminates have excellent impact resistance, but regular heavy impacts directly on the surface may cause chipping or cracking.

MANUFACTURER’S RECOMMENDATION FOR CARE & MAINTENANCE:

- Laminates made up of melamine resin saturate décor paper & surfaces are easy to clean. There is no need to care for them with any special product.
- We recommend using Electrostatic or Microfiber broom (spry broom) for daily cleaning.
- Normal dirt accumulation after long time – We recommend cleaning the surface using mixture of a non-abrasive household detergent and hot water with a sponge or cloth. Use wooden or plastic spatula to remove any solid dirt.
- Stubborn Stains – For cleaning, we recommend using liquid detergent and water mixture soaked overnight. Also, keep adding ¼th part acid from time to time to the mixture. (E.g. For a mild acid based cleaner – Add 1 part acid cleaner to 4 parts water or distilled water). Use only organic solvents for any headstrong marks.
- Runny liquids should always be cleaned promptly, mainly in the areas which have grooves & joinery. The appearance and solidity of the laminate may be affected, if it stays submerged or covered in the liquid for an extended period of time.
- Stains are segregated in the following groups as per the severity of the stains left behind on laminate surfaces.
- Group 1: Acetone, toothpaste, hand cream, urea, alcoholic beverage, vegetable oil, water, NaCl (solution), soap solution and citric acid.
 - Group 2: Coffee, black tea, milk, cola beverages, vinegar, hydrogen peroxide (3% solution), nail polish remover, water color.
 - Group 3: Sodium hydroxide (25% solution), hydrogen peroxide (30% solution), concentrated vinegar (30% acetic acid), acid-based metal cleaners, hair coloring, boric acid, lacquers.
 - Group 4: Citric acid (Zero % solution), acetic acid (5% solution).

Resistance to cigarette burns	Not worse than 3	✓	Not worse than 3	✓
Resistance to steam	Not worse than 4	✓	Not worse than 4	✓
Appearance	Should be free from foreign particles	✓	Should be free from foreign particles	✓

ASD A1, A2 & A3	(Airo Special Decor) Signifies Extra Charge on Premium Designs. Indicates special charges on products.
Grades	Fire Retardant (fr), Electrostatic (el), Magnetic Laminate (ml), Post Forming (pf), Marker Grade (mg), Chalker Grade (cg)
Types	HPL, Post Forming, Compact, Exterior
Size	2440 mm x 1220 mm [8x4ft.], [243.84x121.92cm]
Thicknesses	1.00 mm [other thickness available on request]
Specifications:	Airolam's wide range of decorative laminates is manufactured using multiple layers of Kraft papers and design papers sourced from top Japanese and European manufacturers. The Kraft paper layers are then impregnated with phenolic resins and the design paper with melamine. Then these layers of Kraft and design papers are pressed under heat and pressure. This process makes the laminates stronger and resistant to most wear & tear issues. The use of high-grade raw materials ensures better flexibility and durability.
Disclaimer	Customers are advised to reconfirm selected laminate when placing orders as our liability does not include claims arising from sample chip pasting error. Samples presented are indicative of colour, pattern and surface finish but not of actual thicknesses. All metallic patterns series recommended for vertical application only.
Information & samples	Special cabinet liners, phenolic boards, special purposes compact laminates and post forming laminates are available on request.
Limited Warranty	AIROLAM LIMITED warrants that its products are reasonably free from manufacturing defects. The products when properly used will adhere, with normal deviations, to related manufacturing specifications. This warranty shall be limited only to the original buyer for a period of care, improper use and any alteration. It is recommended that the products must be inspected prior to installation and our liability will be limited to the extent of the cost of the products only. Airolam products are used in various applications, without the possibility of control over the manufacturing of the finished products. The company does not assume obligations or liabilities arising from the furnishing, sale, installation or repair, use or subsequent sale of any product, to any person or entity.
